BSNZ ULTRA CLEAR GLASS

BSNZ Ultra Clear Glass is a multi-use float glass, manufactured with the latest technology of glass-making. It can be used where high clarity and the best optical quality are desired. It is not an ordinary glass. It will take you to the world of your dreams, a world you ever wanted to be in the world of sparkling clarity where you could enjoy the clear reality in glass. Because of the low iron content, BSNZ Ultra Clear Glass produces high light transmission, unlike other float glasses. As its light transmittance is higher than clear float glass, it is perfect for applications where transparency and purity of colour are desired.

BSNZ Ultra Clear Glass gives 1 00 % transparent and sparkling clarity which has no green tint in built as in ordinary clear float glasses. It is ideal for use where glass edges are visible or where a natural colour is desired. Its designed for both exterior and interior applications such as for classy entrances, sophisticated skylights, chic interior partitions, luminous windows, elegant residential glass applications and stylish wall panels, etc. BSNZ Ultra Clear Glass is best choice for crystal clear appearance, luminous, and outstanding look, enhancing the architecture and design.

Available in an extensive range of thicknesses, its unparalleled processing quality gives the highest tempering, coating and laminating yields, which can be processed into insulated glass, laminated glass, toughened glass, and screen-printed glass, etched glass, sandblasted glass, edge-worked glass, lacquered coloured glass, tempering and double glazing.

This is the glass that is close to nature, which is as clear as the water that flows in the oceans. The exceptional clarity of BSNZ Ultra Clear Glass allows maximum natural light to pass through and gives a pleasant view inside which builds a mesmerizing atmosphere in the surroundings. The decreased colour distortion reveals true colours and natural scenic details. Now you can enjoy the brilliant, beautiful and crystal clear look of the glass virtually tint free.

Available Thickness: 5mm, 8mm, 12mm

BSNZ GREEN GLASS

In areas of the world where the sun can get very harsh at times, BSNZ Green Glass is the perfect solution. Aesthetically pleasing and structurally sound, it possesses a sigh of relief that is perfect for an unforgiving summer's day.

The unparalleled light-restricting qualities of BSNZ Green Glass limit the amount of light and heat transmitted through it, thereby significantly decreasing room temperatures and making the indoors more cool and comfortable. Its special tint also ensures an exponential reduction in solar glare, so that your one-time investment in quality green glass can end up saving you tons on air conditioning costs in your home or office.

Its unique green color also gives you a range of architectural options and increases design flexibility, providing you with both form and function in a single, quality solution. In BSNZ Green Glass, you have luxury, style and comfort coming together to create that perfect blend of superior living, be it through glazing of premises or the creation of stylish furniture, original interiors and brilliant decorative displays.

BSNZ Green is perfect for any architectural option which centers around intelligent designing. As like anything else, BSNZ Green is an investment but one that, if ignored, would cost you not only an aesthetic identity but also diminishes your chances to get the best return-on-investment for yourself. It is the new generation of glass which essentially is beauty but at the same time it is something more than that; BSNZ Green Glass is a solution, a very comforting and beautiful one.

Available Thickness: 4mm, 5mm, 8mm, 12mm

BSNZ REFLECTIVE GLASS

Not only BSNZ Reflective Glass is a modern idea of communal privacy, but it is also a canvas that could entertain a range of functionalities. It is a symbol of professional environments and seeks to help integrate a look that conveys seriousness and, at the same time, a sense of privacy in an open world. The scope of designing it can potentially handle ranges from closed office environments to huge architectural demands of skyscrapers.

BSNZ Reflective Glass used in buildings, convey a keen artistic as well as a look that reflect the City's escape from the outside while the inside is transformed into a more modern and productive environment, altogether.

Coupled with that is its extraordinary aesthetic appeal as the perfect cladding for skyscrapers and other tall buildings, creating a mirror effect that is extremely popular with architects and designers, the world over.

Another exceptional property of BSNZ Reflective Glass is that the coating of metal oxides on the glass can be achieved without affecting the transparency of the glass, so the reflective surface does not limit visible light transmission and you can see outside with perfect clarity. What it does do, however, is reflect heat and glare, leaving you with a significantly cooler interior that also lowers cooling costs.

BSNZ Reflective Glass is the perfect tool to bring a sense of elegance and style to any facade. It is usually used in the outer cladding of buildings, interior decoration and show windows.

BSNZ BLUE & FORD BLUE

Ford blue float glass is an endothermic glass product obtained by a bulk colouring process. The Ford blue float glass heat absorption function can reduce the direct transmittance of sunlight and receive certain energy-saving effects; the colour gives the modern building a pleasant decorative function.

Blue has always been associated with calmness and coolness, and that is exactly what BSNZ Blue Glass and BSNZ Ocean Blue Glass do. With a light hue, BSNZ Blue Glass is guaranteed to bring coolness to the eyes wherever it is used.

BSNZ Blue Glass is a serene incorporation of beauty, perfection and enchanting design to elevate comforting professionalism. If it is a message you want to send then it is a BSNZ Blue Glass would send. Glass contributes to identity more than anything and a friendly or calming or even promising identity could be achieved with the right kind of architectural vision and design integration and that is what Crean Blue Glass seeks to achieve.

BSNZ Blue Float Glass is a medium of many inspirations as well as applications that would not only elevate the production value but would also satisfy refined tastes and lively markets. It is simply artistic professionalism and aesthetic production. These float glasses are primarily used in outdoor cladding, especially for a conservatory, facades, outer windows, indoor partitions as well as furniture, interiors and decorative displays.

BSNZ FLOAT LINES

BSNZ Glass has taken the lead to establish Turkey's first state of the art float glass plants based on TECO and design, (Toledo Engineering Company Ohio, USA) the worlds leading company for float glass plant designing. The float glass production facility is located at 29 kms Lahore-Sheikhupura Road with a covered area of 400,000 square feet spread on 25 acres (approx. 1.1 million square feet) of land. This facility comprises of state of the art 2 float lines. Their production capacity is over 1 tons per day, producing world class float glass as per ASTM standards.

BSNZ float lines produce 100% clear, bubbles and distortion free glass ready after being cut into the required size and ready to be taken to the warehouses. The plants are producing float glass of various thicknesses ranging from 2mm to 19mm.

The plants have their own two power generation plants and focus on concern for the environment. Therefore, they have all the relevant certifications of ISO and other operative standards, including certification for being environment friendly. The plants are smoke emission free.

Two full fledged nitrogen processing plants are based at BSNZ Glass Limited. They have the capacity to produce ample nitrogen gas, used during the tin bath of the float glass to make it oxide free, so as to facilitate bubble/distortion free production of world class quality float glass.

The plants are equipped with automatic and virtually intelligent digital control systems (DCS) facility that ensures error free production of extremely high quality grade glass.

VALUE ADDED GLASS:

Successfully operating as a company of BSNZ and under the flagship of BSNZ Company, as a parent company, BSNZ Value Glass is yet another venture of BSNZ Glass panorama, BSNZ Value Glass Limited provides the most extensive research and development facilities which go hand in hand with the provision of innovative new value added glass.

BSNZ Tempered Glass

BSNZ Tempered Glass is five times stronger than ordinary glass, its high strength is the reason why it has been termed as an industrial revolution and is immensely popular in domestic and industrial spheres. The tempered glass does not break into shards and so is not a safety hazard if it breaks. BSNZ Tempered Glass is used in shower compartments, partitions, doors, interiors, and stairs and it is also used in the exterior of buildings for decorative and protective purposes. It is gaining unparalleled popularity in consumers and architects alike.

BSNZ Mirror

BSNZ silver/aluminium coated mirror is one of its kind, with crystal clear mirror images it is a must have addition in every household. This variety of mirrors can be used in industrial, domestic, commercial and decorative applications.

BSNZ Double Glazed Glass

BSNZ Double Glazed Glass provides you with the comfort you need in your office, home or commercial building. It is available in different thicknesses and is of the highest quality. It keeps out noise pollution and extreme weather when installed in windows. BSNZ Double Glazed glass has been ruling the hearts of architects, interior designers and builders, being increasingly used where soundproofing and temperature control are required.

BSNZ Painted Colour Glass

BSNZ Painted Colour Glass is exquisite and stylish. It is used for decorative purposes in homes, showrooms, interior decorations, etc. and it comes in a plethora of colours. Architects and interior designers use it to give your kitchen, drawing room and offices a unique look. It is available in Black, Red, Dark Red, Blue, White, Off White, Grey and Beige colours.

None Value Added Glass Products

BSNZ laminated safety glass, bent glass and bulletproof glass are yet another value added glass products, manufactured under the umbrella of BSNZ.

QUALITY STANDARDS, AND GLASS PROCESSING

BSNZ Company follows stringent qualitative measures to ensure that it would always deliver the best and nothing else. Following the ASTM International (American Society for Testing and Materials) standards. BSNZ is renowned and recognized for excellent product quality as well as the finest workmanship, which is expertly translated into aesthetic qualities and architectural visions.

"Nothing less but may be more" is what drives our Quality Assurance agenda. Globally accepted production regulations and visionary industrial finesse contribute to the final the product that we offer to satisfied customers that share a history of satisfaction with us. Glass is not just a business to us but a business of values which require us to put in the best of the best efforts to achieve genuine satisfaction for both our customers and ourselves.

As a corporate citizen, GGL is well aware of its responsibilities towards the environment. ISO 14001 International Certification has acknowledged its strict measures to save the environment. ComanVs international standardization has been endorsed by all ISO certified, as well.

Our R&D department is a dynamic and inventive brain power that is constantly looking forward. Owing to the top of the line quality, BSNZ float glass is highly suitable for value additions/glass processing, including tempering, double glazing, silver/aluminium mirror coating, colour coating, tinting, glass bending etc. In short, BSNZ Glass is prepared for the future.
